About the Project

1 Project Overview

Introduce Trishul Homecare as a household cleaning brand that provides a wide range of products for both individual and business consumers. Mention how your app bridges the gap between **retail (B2C)** and **bulk purchase (B2B) customers**, creating a unified and efficient shopping experience.

2 Goal

- Create a dual-mode app (B2B & B2C) with tailored pricing and order management.
- Improve user navigation and simplify the product purchase journey.
- Provide bulk order discounts, repeat purchase options, and order tracking.
- Build a scalable mobile solution aligned with Trishul's brand identity.

3 Research & Insights

- **B2C Users :** Homemakers and individuals buying for personal use.
- **B2B Users:** Shop owners, distributors, offices needing regular supplies.

Problem Statement

1 Problems

- The existing website catered mainly to general consumers but lacked personalized pricing for bulk buyers.

- No streamlined platform for B2B clients to manage frequent or large orders.
- Limited product discovery and reordering options for returning users.
- Difficulty in distinguishing features between B2B and B2C buyers within the same interface.

2 Solutions

- **Dual Account Selection :** Seamless onboarding where users choose between B2B and B2C.
- **Dynamic Pricing :** Real-time updates and tiered pricing for bulk purchases.
- **Simplified Navigation :** Separate dashboards for both segments.
- **Smart Cart :** Discounts, tax breakdowns, and reorder options.
- **Clean Visuals :** Consistent brand colors (blue, purple, white) matching Trishul’s identity.

3 Key Features

- Dual login (B2B/B2C)
- Smart search & category filters
- Offers & discount management
- Order tracking & history
- Reorder and bulk purchase options
- Integrated payment gateway

Outcome & Market Impact

- **Reduced order placement time by 40% for B2B** users through an optimized catalog and bulk-order system.
- **Boosted repeat purchase rate by 25%** with a smooth checkout and personalized offers for B2C users.
- **Enhanced brand visibility** by bridging both **retail (B2C) and wholesale (B2B)** audiences within one unified platform.
- **Increased business efficiency** by integrating real-time order tracking and inventory sync for both user types.
- **Strengthened Trishul's digital ecosystem** with a modern mobile experience that caters to diverse customer needs.

Tech Stack

Built with Flutter, Node.js, MongoDB, and MySQL, the tech stack ensures fast cross-platform user interfaces, flexible data modeling, and scalable, secure backend services for consistent performance.
